

'Making Kildare the Place to Live, Learn, Work, Visit and Do Business'

Kildare County Council recently launched the video presentation of its Corporate Plan 2015-2019. The aim of the video is to highlight Kildare as the Place to Live, Learn, Work, Visit and Do Business.

The video was created by four graduates from the Local Government and Enterprise Ireland Graduate Programmes, utilising the digital studio operated by the Kildare Library and Arts Service in Leixlip. Footage from around the County was gathered through a combination of in-house filming by the graduates and submissions from some of the participants. The editing of the video was done in its entirety by the graduates themselves.

The video highlights a taste of the best of Kildare and will be used as a promotional tool for the County. With that in mind, we would appreciate if you could share this on your own social media pages. The video along with more details on the Corporate Plan can be found here:
